ALX

Lagos, Nigeria

Student at ALX, Software engineering

Feb 2022- Date

- Mastering Fundamental engineering concepts and become skilled in Coding.
- Understanding data structures and Algorithms.
- Enjoy collaborating with other team members and digging into new challenges.
- Acquiring strong technical knowledge to build a career in front and backend.

EXPERIENCE

RECEIVE-(STARTUP)

Front End developer

- Successfully developed a responsive website for the company using REACT framework
- Converted the design from the product design team to high quality codes.
- Successfully worked and collaborated with the backend unit and other external teams.

PROJECTS AT ALX

AirBNB website(clone)

- Design a command interpreter to manipulate data without visual interface.
- Built the website(Front-end) that shows the final product using HTML/CSS.
- Design a database that store data(data =objects).
- Use of mySQL as database storage and mapping models to a table using object relational mapping.
- Design an API that communicates interface between front-end and the data.

ELIZADE NIGERIA LIMITED (TOYOTA)

Lagos State,Nigeria

Electrical technician

Feb 2022 - DATE

- Ensured there was constant power supply at the premises through generator maintenance.
- Successfully reduced diesel consumption through installation of inverters to be used over generators for security purposes at night
- Prevented electrical hazards through maintenance of terminals
- Successfully rectified any electrical issue

BI – COURTNEY LIMITED (MMA2)

Lagos State,Nigeria

Electrical Technician Intern

Jun 2019 – Jan 2020

- Maintained power supply stability through fulfillment of electrical bill invoice and generator maintenance
- Improved revenue generating activities through early and regular meter reading from airport shops
- Prevented airport electrical hazards through maintenance of terminals
- Handles customers electrical complaint to ensure top notch satisfaction

SMART ENERGY METER, B.ENG PROJECT, FUTA

Ondo State,Nigeria

Project Supervisee/Operator

Aug 2020 – Jan 2021

- Researched on smart energy meter to improve meter readability for electricity companies
- Designed and simulated the circuit with Proteus software
- Constructed smart reader prototype to communicate energy consumption data to any designated mobile number

INDUSTRY SKILLS

- Software Skills: Auto Cad, Microsoft Word, Proteus, Matlab, Visual Studio
- Programming Skills: HTML, CSS for Web Design, Python, C#,C, JavaScript., React, React-Native, mySQL, JQuery, Building API, Flask, Django.
